PROJECTS

- **Laundry management System**
This application is developed to manage the laundry service and provide an automated backup and recovery. For security management of information in the laundry. The aim of the application is to determine the number of clothes collected, in relation to their owners, as this also helps the users fix a date for the collection of their clothes. Also, customer's information is secured, as a specific ID is allocated per registration to avoid contrasting information.
- **Chatbot using Python**
A computer program designed to stimulate conversation with human users, especially over the internet. This is making other businesses available on messaging platforms leads to proactive interaction with users about their products. To interact on such messaging platforms with many users, the business can write a computer program that can converse like a human which is called a chatbot.
